---

## EXPERIENCE

### TRUETREK

Full Stack Developer

User Authentication & Authorization

Real-Time User-Generated Content: Users create travel locations with live, unedited photos and geolocation metadata.

Interactive World Map: Integrated a map API (Mapbox) to display user-created locations with dynamic markers and popups.

Social Interaction System:

- Comment threads with nested replies
- Upvote/downvote system for comment ranking

Full-Stack Architecture: Built with modern frontend and backend frameworks, RESTful routes, database models for users/locations/comments, and responsive UI/UX.

AI & External API Integration

### PROJECT MANAGER

Original Media Global Show 2024 - 2025

Coordinating pre-production logistics and schedules

Working closely with the director and producers
